

JULY 2019

Onward and Seddon are collaborating on a joint venture to deliver high quality, affordable homes for residents in Goosnargh.

Throughout our stay in Goosnargh, we will share quarterly newsletters with you to ensure the whole community is involved and kept fully up to date at each stage of the development. It's important that our activities drive positive outcomes for the area and local residents.

We are currently developing a website specifically for the scheme which will be updated with news about progress, community projects and training opportunities.

We will shortly issue further details of our site management plans which you will be able to view via the Parish website. During the course of the project, we plan to hold drop-in surgeries for residents to meet the team who will answer any queries or explain current or pending activities. Details of these will be announced on the website.

Project Update:

During the past couple of months, we have completed some minor works with the installation of a new barrier to the perimeter of the site and the diversion of a BT cable.

Works have commenced to secure the site and the hoardings have now been installed to the site entrance. By the end of July we anticipate the site entrance will be widened enabling direct access onto the site which will limit disruption to the surrounding public roads.

Construction activities will commence in early August 2019. Our site hours are Monday to Friday 8.00am till 4.30pm and our activities will be carefully coordinated around school arrival/pick up times, and peak times for local businesses and traffic in the area.

Site Contacts:

Day to day management will be provided by Seddon site manager, Jon Dutton. Should you have any questions about the project throughout the build programme please contact Jon via the details provided.
